

I truly value the Telephone Privacy Act of Indiana. I used to receive several telephone sollicitaions a day. I was at the point of having my home phone shut off - but the Privacy Act saved that from happening. I receive calls only every so often now; to the point I can deal with it. Please allow the Indiana Privacy Act to remain as is with no modifications. In fact, if you are considering a national law, I would propose the guidelines of the Indiana law be considered for the structure of the national law.
